Serhii Glova

Chief Technology Officer · System Architect · AI & Cloud Engineering Lead

Email: sergey.glova@gmail.com · **Phone:** +380 97 211 13 58 · **Telegram:** @s0fractal · **GitHub:** github.com/s0fractal · **Location:** Kyiv, Ukraine (Remote)

Executive Summary

- **20+ years of end-to-end IT experience** (since 2005): 10+ years as CTO, System Architect, and Engineering Lead.
- **AI Integration & Autonomous Systems**: Deep practical expertise in LLM orchestration, agent workflows, cost-efficient AI pipelines, and mathematically verifiable decision records.
- **CRM & ERP Core Expertise**: Extensive hands-on and leadership track record designing, migrating, and implementing complex CRM/ERP platforms, business process engines (ITIL/ITSM), and data pipelines.
- **Hands-on Technical Leadership**: Full-stack architecture (Node.js, TypeScript, Java/Spring, Rust, Python, Go), cloud infrastructure (GCP, Firebase, Docker), relational/NoSQL databases, and cybersecurity hardening.
- **Business & Operational Impact**: Entrepreneurial mindset, technology budget optimization (cutting cloud/API spend), building and mentoring high-performing engineering teams, and direct pre-sales/discovery.

Technical & Architectural Competencies

- **AI & Intelligent Systems:** LLM Orchestration, Multi-Agent Workflows, Evaluation Runtimes, Token/Cost Optimization, Formal Verification (Lean 4), Prompt Architecture
- **Enterprise Architectures:** CRM/ERP Platform Migration, Distributed Systems, Event-Driven Architecture, Microservices, API Gateways
- **Programming Languages:** Node.js / TypeScript, JavaScript, Java (Core, Spring ecosystem), Go, Python, Rust
- **Databases & Data Modeling:** PostgreSQL, MSSQL, MySQL, Firestore, MongoDB, Firebird, Data Warehousing, Schema Migration
- **Cloud & Infrastructure:** Google Cloud Platform (GCP), Docker, Firebase, Linux/Unix Administration, CI/CD, Zero-Trust Security
- **Leadership & Processes:** Technical Strategy, Team Building & Mentoring, Scrum/Agile, ITIL/ITSM, Vendor Management, Cost Optimization

Professional Experience

Glova S.A. / Independent Technical R&D & Consulting
Roles: Chief Technology Officer · Lead System Architect · R&D Lead
Duration: 2017 – Present

2022 – Present: AI Integration, Agent Systems & Decision Infrastructure

Architecting production-ready AI pipelines, verifiable agent coordination protocols, and cost-bounded inference architectures:

- **`warrant`**: Content-addressed decision record protocol with deterministic, offline-replayable justification verification (multi-language: Rust, Go, Python) and formal Lean 4 safety invariants.
- **`sokol-core`**: High-assurance system architecture powered by contract checkers, strict spec-driven development, and counter-vector mutation testing.
- **`black-heart`**: Tamper-evident, self-verifying document format with an embedded WebAssembly inspection engine for zero-trust offline verification.
- **`sigma-glyph`**: Deterministic combinator-calculus evaluation engine and formal execution bounds for automated reasoning.
- **`stargate`**: Multi-agent interlock protocols and coordination mechanisms for autonomous enterprise workflows.
- **AI Cost & Resource Optimization**: Engineered lightweight evaluation runtimes and prompt/context budgeting strategies that minimize API costs while guaranteeing high output reliability.

2017 – 2022: Cloud Engineering & Custom Enterprise Automation

- **Enterprise Cloud Architecture**: Built distributed services and data integration pipelines using GCP, Firebase, Docker, and Node.js.
- **Algorithmic Problem Solving**: Researched and implemented specialized combinatorial algorithms for complex enterprise scheduling and resource management (NP-complete optimization).
- **Security & Systems Hardening**: Audited and secured infrastructure, implemented role-based access control, and hardened integration APIs.

Agrodev
Roles: Co-Founder · Lead Software Developer
Duration: February 2017 – October 2017 (7 months)

- **Agritech Modeling R&D:** Researched, modeled, and visualized crop yield dependencies based on mutual plant spatial placement derived from PhD academic research.
- **Analytics Engine:** Built interactive visualization tools and analytical calculation engines.
- **Tech Stack:** Java 8, AngularJS, WolframAlpha API.

Wise IT Systems
Roles: Founder · CTO · Lead Architect
Duration: June 2008 – December 2014 (6 years 6 months)

- **Technical Leadership:** Directed system architecture and managed engineering teams delivering enterprise solutions.
- **CRM/ERP Implementations:** Designed database schemas, complex business workflows, and data integration pipelines for corporate clients; scaled company to certified Terrasoft Implementation Partner.
- **Client & Business Discovery:** Led technical pre-sales, requirements discovery, and client delivery.
- **Tech Stack:** MSSQL, JavaScript (Terrasoft 3.x), Custom Integration APIs.

Easy Systems
Role: Technical Team Lead
Duration: October 2007 – June 2008 (8 months)

- **CRM Solution Architecture:** Designed architectures and optimized enterprise business processes on CRM platforms.
- **Team Management:** Led code reviews, task estimation, developer mentoring (SQL, JScript), and client audits.
- **Tech Stack:** MSSQL, JavaScript (Terrasoft 3.x).

Terrasoft
Roles: Software Developer · Technical Support Engineer
Duration: August 2006 – September 2007 (1 year 2 months)

- **Developer Platform SDK:** Authored technical documentation and guides for developers using the Terrasoft SDK.
- **Internal Tooling & Support:** Developed internal MSSQL administration tools; provided tier-3 technical consulting.

Industrial Media Network (IPNET™)
Role: Network & Customer Support Engineer
Duration: September 2005 – March 2006 (6 months)

- Administered network infrastructure, monitored network health, and resolved tier-1/tier-2 customer incidents.

Education

National Technical University of Ukraine “Kyiv Polytechnic Institute” (NTUU KPI)
Degree in Computer Science / Engineering

Languages

- **Ukrainian:** Native · **English:** Professional working proficiency
